Version: 2.1

Snapshot company overview

The objective of HUMAN RESOURCES MEXICO is to attract investors and businesses to México by presenting Mexico and its culture in the positive manner it deserves. We believe México has not been fairly represented in the foreign media in the past. We intend to change that perspective. (*The Truth About Mexico* - <http://yourhrcompany.com/content/view/41/107>)

Franklin Frith is our General Manager who is our Principal and Chief Executive Officer who was born and raised in the United States and currently lives and works in México. Franklin speaks Spanish fluently and he has more than 20 years experience in HR outsourcing and business development. With our "hands on" approach we handle your Mexican business goals and needs full time, right here in México. You will find that our staff is "on the ground and in the trenches" to help you accomplish your business goals.

Human Resources México will setup your company / operations in México; manage all aspects of Human Resources; locate and identify distributors / reps; attend special meetings, and/or to handle your merger / acquisition needs.

Foreign companies who desire to employ people in México can place the employees under our employment umbrella. This reduces the financial /administrative burden and risk associated with having employees in a foreign country. We will help you focus on revenue and profits instead of spending energy and efforts on human resource administration. Instead, HRM will assume responsibility for and manage all of your employment related issues in México.

What about México?

Mexican Production Costs Are Lower than China and India

Study by AlixPartners - May 2009

The business consulting and analysis firm AlixPartners has for several years published a study analyzing production costs for offshore manufacturing of goods conducted in different countries. The study takes into account factors such as labor costs, exchange rates, transportation costs, raw materials cost and availability, and customs procedures. In accordance with the study recently published by AlixPartners, in 2008 Mexico gained the top spot for the country with the lowest cost of production, followed by India and China respectively. The study reveals that production costs for similar goods are 25% lower in Mexico than in the United States, while production costs in China are only 6% lower than those in the United States. This is true even though transportation costs increased in the last year. However, such consulting firm considers that Mexico's greatest asset is its strategic location, and the existence of the North American Free Trade Agreement, which provide significant competitive advantages. AlixPartners does not expect Mexico to cede its first place position to either China or India in 2009.

Mexico's Business Attractiveness

1= Most attractive 5= Least attractive

	Access to market	Business environment	Quality of infrastructure
Philippines	3.5	3.7	2.8
India	3.5	3.6	3.3
Malaysia	3.3	3.4	2.5
China	1.8	3.6	2.5
Brazil	4.2	3.0	2.0
Mexico	2.8	2.6	2.0
Czech Republic	3.5	3.0	3.0
Hungary	3.3	2.8	2.8
Poland	3.3	3.1	3.0
Russia	2.8	3.3	3.3
